A. INTRODUCTION

Salary Anytime (the 'Company'), in compliance with the Reserve Bank of India (Non-Banking Financial Company – Scale Based Regulation) Directions, 2023 and various circulars issued from time to time, has adopted this Interest Rate & Charges Policy ('Policy') to lay out appropriate internal principles and procedures to arrive at benchmark rates to be used for different types of customer segments and to decide on the principles and approach of charging spreads to arrive at final rates charged from customers for its

B. METHODOLOGY

The Company has implemented a **Risk-Based Pricing (RBP)** framework.

Risk-based pricing refers to the concept of offering differential interest rates to different customer-classes based on the inherent riskiness in their profiles and overall creditworthiness. This is done to ensure that lending institutions are fairly compensated to the extent of the risks that they will undertake owing to onboarding a particular kind of customer.

The average yields and the rate of interest under each product shall be decided from time to time, giving due consideration to the following factors:

- a) The cost of funds on the borrowings, as well as costs incidental to those borrowings, taking into consideration the average tenure, market liquidity and refinancing avenues etc. Under the Risk Based Pricing approach, the Company computes the Weighted Average Cost of Capital (WACC)
- b) Operating cost in our business and maintaining the stakeholder's expectations for a reasonable, market competitive rate of return
- c) Inherent credit and default risk in our business, particularly trends with sub-groups / customer segments of the loan portfolio
- d) Nature of lending, for example unsecured/secured, and the associated tenure
- e) Nature and value of securities and collateral offered by customers
- f) Subventions and subsidies available, if any
- g) For loans with tenure greater than 3 years, the Company will also add a tenor premium under the Risk Based Pricing approach
- h) Risk profile of customer including professional qualification, stability in earnings and employment, financial positions, past repayment track record with us or other lenders, external ratings of customers, credit reports, customer relationship, and future business potential
- i) Industry trends including offerings by competition

C. ORGANIZATION STRUCTURE

1. Board of Directors

The Board of Directors shall have oversight for the Interest Rate & Charges Policy. To ensure effective implementation of the Policy, the Board may delegate the implementation of the Policy and its operational aspects to the respective Business Head and/or ALCO as may be deemed fit.

2. Asset Liability Management Committee (ALCO)

ALCO shall be responsible for evaluating and approving the Interest Rate range (the minimum and maximum rate the Company can charge within which loans shall be granted to the customers). Any changes in the Interest Rate range shall be approved by the ALCO and would be put up to the Board in the subsequent meeting.

Respective Product Manuals, with the approval of the Business Head, may have their internal pricing policies under the overall framework of Board approved Policy to arrive at the final rate to be charged to the borrower depending on various factors. Changes to product level internal pricing policies, if any, shall be approved by the respective Business Head and any changes beyond the range shall be approved by ALCO.

D. INTEREST RATE MODEL

The model for the type of interest rate on respective products shall be defined in the respective product manuals. The Company shall adopt a discrete Policy which shall mean that the rate of interest for the same product and tenure availed during the same period by separate customers may not be standardized but shall vary within a range, depending on the factors mentioned below.

The Company adopts a Risk Based Pricing interest rate model which takes into consideration the current pricing structure, funding sources, cost components, historical data on income, expenses, and returns which are then analyzed to identify key pricing parameters. WACC and operational costs are used to determine the minimum lending rate. Product- and borrower-specific risk premiums are then added to arrive at the final lending rate. *(Refer Annexure 2 for latest interest rate range)*

E. APPROACH FOR GRADATION OF RISKS

Risk grading enables the Company to differentiate customers across different risk spectrum and helps in applying risk premium to that customer. The Company shall assign a rating score to all its loans, which shall take into account various factors like the past track record, the financial robustness of the project, security offered, various risks associated with the project such as market risk, operating risk and regulatory risk, and mitigation thereof.

The risk premium attached with a customer shall be assessed based on the following factors:

- 1. Profile and market reputation of the borrower
- 2. Tenure of relationship with the borrower group, past repayment track record and historical performance of similar clients, overall customer yield, future potential, repayment capacity based on cash flows and other financial commitments of the borrower, mode of payment, and group strength for corporate loans
- 3. Nature and value of primary and secondary collateral / security

- 4. Type of asset being financed and end use of the loan represented by the underlying asset
- 5. Interest and default risk in related business segments, including market volatility and competitor review
- 6. Bureau score of an individual which determines the credit payment history across loan types and credit institutions over a period of time
- 7. Regulatory stipulations, if applicable
- 8. Under the Risk Based Pricing approach, the Company has identified certain parameters for borrowers within each product such as LTV for Gold Loan and Industry type for Business Loans which will be used to add borrower specific premiums
- 9. Any other factors that may be relevant in a particular case

Business practices will be conducted in a manner to ensure the maximum interest rate charged does not exceed the range calculated as per the Risk Based Pricing framework. However, in case the maximum rate charged for any product is above the range described in accordance with the Risk Based Pricing framework, the same will be submitted to the ALCO committee and will be presented in the subsequent RMC with proper justification.

F. SECURED BUSINESS LOAN - FLOATING REFERENCE RATE (FRR)

The FRR serves as the internal benchmark rate for determining interest rates on floating-rate loans sanctioned under the loan against property product. It is calculated based on several key variables, as outlined below:

1. Cost of Funds

The average cost of funds across all financial instruments is a critical input for calculating the FRR. Adjustments to the FRR are made in response to changes in borrowing costs, such as shifts in MCLR spreads or rate changes by lenders and banks.

2. Operating Expenses (Opex)

The expected operating expenses incurred by the Company, including personnel costs, administrative costs, and depreciation, are factored into the FRR calculation.

3. Credit Costs

Anticipated credit losses and provisions are added to the FRR. These credit losses may vary depending on the product type.

4. Return on Capital

The desired return on capital or profitability for the business is incorporated into the FRR to ensure financial sustainability.

Type of Interest Rate: Floating Rate

Floating Rate Loans

Floating rate loans are offered to customers at a rate determined by the FRR, adjusted by a discount or premium, as decided during loan sanctioning.

The Company reviews the FRR on a quarterly basis to reflect changes in market conditions. This ensures that the business remains competitive during favourable market conditions and sustains profitability during adverse conditions. Adjustments to the FRR will be made based on changes in the underlying variables, such as cost of funds, operating expenses, credit costs, and desired returns.

Regular monitoring and recalibration of the FRR enable the Company to safeguard its business growth and align with evolving market dynamics.

Introduction of FRR w.e.f 12th December 2024

Component	December 2024	Methodology
Cost of Funds	10.50%	Variable
Operating Cost of Business	4.50%	Variable
Expected Return on Capital	4.00%	Fixed
Credit Losses	1.50%	Fixed
Calculated FRR	20.50%	—

Principles and Procedures for Charging Spreads to Calculate Final Rate

The final rate of interest for loans offered will be arrived at after reducing / adding spread by the credit and business team. Some key factors (illustrative but not exhaustive) considered by businesses for calculating spreads are:

- 1. Credit and default risk in the related business segment
- 2. Profile of the customer
- 3. Nature and value of collateral security
- 4. Ticket size of loan
- 5. Bureau Score

- 6. Tenure of Loan

G. COMMUNICATION TO CUSTOMERS

- The Company shall intimate the borrower the annualized rate of interest at the time of sanction of the loan along with the tenure and amount of EMI apportionments towards interest and principal. Interest would be charged and recovered on a monthly, quarterly basis or such other periodicity as may be approved by the designated authority. Specific terms in this regard would be addressed through the relevant product policy.
- The customer shall also be informed that the Policy is available on the Company website and any change in the benchmark rates (Floating Reference Rate) and charges for existing customers would be uploaded on the website of the Company.
- The Company shall ensure that all changes to interest rates and charges are implemented only on a prospective basis.
- Any changes in the rates and charges for existing customers would also be communicated to them through either email, letter or SMS. Interest changes would be prospective in effect and intimation of change of interest or other charges would be communicated to customers in a manner deemed fit, as per terms of the loan documents. Interest shall be deemed payable immediately on due date as communicated and no grace period for payment of interest is allowed.
- In case of staggered disbursements, the rates of interest would be subjected to review and the same may vary according to the prevailing rate at the time of successive disbursements or as may be decided by the Company.
- The Company shall ensure compliance with the RBI Fair Practices Code guidelines as updated from time to time and as adopted by the Company through its Fair Practices Code. Statement of account will be made accessible to the borrowers through any acceptable mode of communication, as and when requested by the borrower.
- Penalties for non-compliance with material loan terms by the borrower shall be classified as 'penal charges' and not as 'penal interest' added to the loan's interest rate. Penal charges will not be capitalized, meaning no further interest will be calculated on them. This does not affect the normal compounding of interest in the loan account.
- The Company is committed to ensuring transparency and compliance by not including any additional components in the interest rate and adhering strictly to the prescribed guidelines in both letter and spirit.
- At the time of loan sanction, borrowers will be clearly informed about how changes in the benchmark interest rate (FRR) could affect their EMI and loan tenure, ensuring they are fully aware and prepared for any potential adjustments.
- At the time of reset of interest rates, the borrowers shall be given the choice to opt for enhancement in EMI or elongation of tenor or for a combination of both options; to prepay, either in part or in full, at any point during the tenor of the loan with applicable charges as per schedule of charges.
- Claims for refund or waiver of such charges/penal charges/additional charges would normally not be entertained by the Company and it is the sole and absolute discretion of the Company to deal with such requests.
- Upon resetting interest rates, the Company shall offer borrowers the option to switch to a fixed rate, which may define the number of switches permitted during the loan tenure.
- All charges associated with switching from floating to fixed rates and switch frequency allowed, including service or administrative costs, have been mentioned in the relevant tables.
- The Company will ensure that any extension of the tenure for a floating rate loan does not lead to negative amortization.

H. OTHER CHARGES

Besides interest, other financial charges like processing fees, cheque bouncing charges, prepayment/foreclosure charges, part disbursement charges, cheque swaps, cash handling charges, RTGS/other remittance charges, commitment fees, charges on various other services like issuing No Due certificates, NOC, letters ceding charge on assets/security, security swap and exchange charges etc. would be levied by the Company wherever considered necessary.

The levy or waiver of these charges for different products or facilities would be decided within the limits prescribed under the policy (Refer Annexure 1). Any changes in the charges shall be approved by the ALCO and would be put up to the Board in the subsequent meeting.

Besides the base charges, the Goods and Service Tax (GST) and other cess would be collected at applicable rates from time to time. Any revision in these charges would be with prospective effect. A suitable condition in this regard would be incorporated in the loan agreement. Any fees, charges, etc. which are not mentioned in the KFS, shall not be charged to the borrower at any stage during the term of the loan, without explicit consent of the borrower.

I. REVIEW OF POLICY

The Policy shall be reviewed by the Board of Directors annually or more frequently as may be required.

J. ANNEXURE 1 – FEES AND CHARGES

GOLD LOAN

Processing Charges	Penal/ Default Charges	Mark to Market (MTM) Charges	Stamp Duty & Statutory Charges	Auction Charges	Overdue Notice Charges	SMS Charges	Part-Payment Charges	Foreclosure Charges	Gold Maintenance Charges
--------------------	------------------------	------------------------------	--------------------------------	-----------------	------------------------	-------------	----------------------	---------------------	--------------------------

Processing Charges	Penal/ Default Charges	Mark to Market (MTM) Charges	Stamp Duty & Statutory Charges	Auction Charges	Overdue Notice Charges	SMS Charges	Part-Payment Charges	Foreclosure Charges	Gold Maintenance Charges
Upto 2%	0.5% p.m. (6% p.a.) inc. GST	₹500 inc. GST	As per applicable state laws	₹1,500 inc. GST	₹200 per Notice inc. GST	₹5.9 per Quarter inc. GST	NIL	NIL (min. 7 days int.)	₹5-10 per day excl. GST

BUSINESS LOAN

Processing Charges	Penal/ Default Charges	NACH / E- Mandate Bounce	Documentation Charges	Bank Swapping Charges	NeSL Reporting	Stamp Duty & Statutory Charges	Foreclosure Charges	Cooling Off Period
Upto 5%	2% p.m. (24% p.a.)	Upto ₹2,500	Upto ₹4,500	₹500	As Applicable	As per applicable state laws	0-6M: 7%; 7-24M: 5%; >24M: 4%	7 Days

PERSONAL LOAN

Processing Charges	Penal/ Default Charges	NACH / E-Mandate Bounce	NeSL Reporting	Stamp Duty & Statutory Charges	Foreclosure Charges	Cooling Off Period
Upto 5%	2% p.m. (24% p.a.)	₹500	As Applicable	As per applicable state laws	Maximum 7%	7 Days

Note: Personal Loan has been discontinued w.e.f. February 16, 2024. However, Employee Loan sourcing under the Personal Loan category is still allowed.

DIGITAL FINANCE

Processing Charges	Penal/ Default Charges	NACH / E- Mandate Bounce	Documentation Charges	Bank Swapping Charges	NeSL Reporting	Stamp Duty & Statutory Charges	Foreclosure Charges	Cooling Off Period
Upto 5%	2% p.m. (24% p.a.)	₹500	Nil	₹500	As Applicable	As per applicable state laws	Nil	7 Days

Note: Digital Finance arrangement has been discontinued w.e.f. September 30, 2024. Currently, the arrangement with Xtracap continues to remain active as per existing terms.

SUPPLY CHAIN FINANCE

Processing Charges	Stamp Duty & Statutory Charges	Penal/ Default Charges	Cooling Off Period	NeSL Reporting
Upto 2%	As per applicable state laws	2% p.m. (24% p.a.)	7 Days	As Applicable

COMMERCIAL REAL ESTATE

Processing Charges	Penal/ Default Charges	Collateral Evaluation Charges	Pre-Payment / Foreclosure Charges
Upto 2% of approved loan amount	0.5% p.m. (6% p.a.)	As Actuals	Upto 4%

LOAN AGAINST SECURITIES
